

Welcome to the 2017 8th Annual Thorium Energy Alliance Future of Energy Conference Aug 21 and 22 St. Louis, MO

Dear Conference Participants,

Welcome to the 8th annual Thorium Energy Alliance – Future of Energy Conference. During this event, we will be highlighting the existing development activities, explore opportunities for expanding the role of thorium in our energy portfolio, and evaluate regulatory and other constraints.

We've had a busy and productive 26 months since our last meeting on many fronts including furthering legislative directives in congress, opened new avenues of state-based assistance in Thorium and Rare Earth initiatives, furthered MSR technology and countless outreach and education programs.

I would like to thank our sponsors for their generous financial and in-kind gifts. We would not be here today without their help.

Finally, thank you for attending, most of you have travelled a long distance (often at your own expense) to be here. It shows me that there is a real and determined group of individuals, from all sectors, who want and strive for a future of clean, safe, reliable energy.
