

TEA Kicking Off 2021

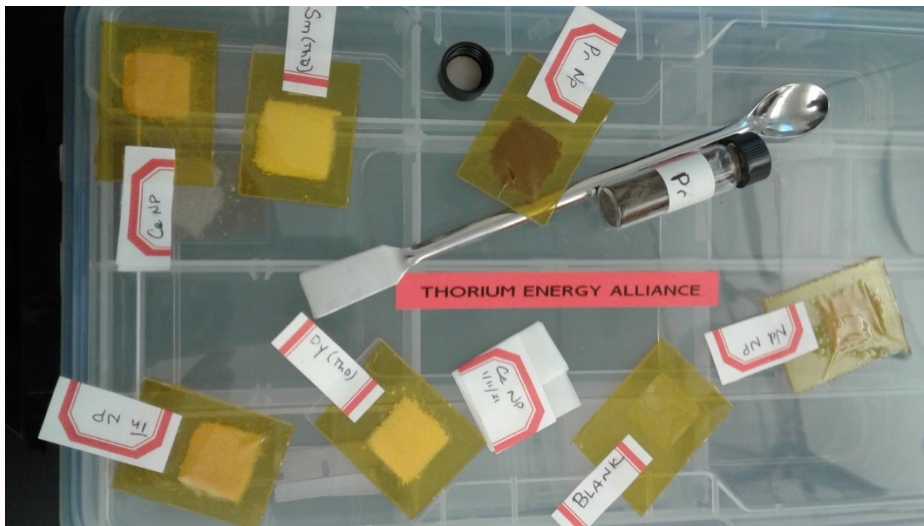

Thorium Will Power The World

New Explorations in Thorium

The TEA is continuing to work with our Critical materials partners to bring new approaches to using Thorium for a wide array of industrial applications.

TEA has worked to create new methods to apply to discoveries made decades ago. This work will not only allow for uses and applications of Thorium as a Technology Metal, it will directly help restart the Heavy Rare Earth Metals industry in the USA. This has been a results-focused partnership with meaningful work products expected now, not in decades.

Why is this important - Technical Metals, including Thorium, will lay the foundation for advances in technology that will directly impact clean energy production, improved medical diagnostics and treatments and water purification to name a few. These building blocks will spur the innovations not yet conceived and will be crucial to solving our largest existential threats. The TEA is proud to be playing a small but important role by undertaking this work.

RP3C – RIBP

The Thorium Energy Alliance has supported the work of the ANS 20.2 writing group for years. Vince Lackowski has managed the writing of the ANS Standard for Molten Salt Reactors.

Part of the standard defining MSR is the ways in which one designs with risk mitigation in mind.

The TEA is going to give an assessment of one type of process called Risk Informed Performance Based (RIPB). We think it is an important method, but certainly not the only method – and what we really need, are Real running test reactors. Otherwise, what are we basing the risk information on? – just applying old data to new designs? That is okay, but we can do so much better.

If you are inspired to spend 1 hour on a Friday watching folks [talk shop](#), come join the meeting this Friday (January 29th, 2021 3 pm EST)

Thanks to a new Corporate Sponsor

We want to thank corporate sponsors like UNI International America Corp. and Joseph Schulte – Your support makes all the difference! [Uni International](#) knows that the future has to be Thorium

We have had members and companies that are on their 12th year!

We believe the dedicated support for that long shows that we are exceptional stewards of your gift.

TEA spends every dime on making Thorium the Future, we are grateful for your trust and generosity. [Become a Corporate or Individual Sponsor](#). We have membership plans to meet any level of sponsorship.

Donate that Old Boat!

Or Car, or RV, or Plane . . . that hunk of [junk is worth a very lot](#) to us!

Thank You - to everyone who has helped us along the way and here's to a productive and fruitful 2021

John Kutsch
Thorium Energy Alliance
