Day 1 Only + Movie Night - \$109

Day 2 Only + Reception - \$139

Both Days - \$229

Both Days + TEA Shirt - \$245

#### **SPEAKER & PRESENTATION TIME SLOTS AVAILABLE.**

The Thorium Energy Alliance Future of Energy Conference is a great platform for leading Thorium experts to present and discuss cutting edge concepts with the entire community, For more information on presenting at TEAC 11 please contact the

Thorium Energy Alliance at [thoriumenergyalliance@gmail.com](mailto:thoriumenergyalliance@gmail.com).

---

### Our first in-person Conference in 3 Years!

The Thorium Energy Alliance is confidently moving ahead to assemble a world class panel of Thorium experts in a safe and responsible setting. We are excited to present this conference and museum exhibit for the Thorium Community as well as anyone interested in Thorium. We need to emphasize that space is limited, so please get your registration in soon!

---

### Proof that Outreach Works! Saving Illinois NPPs

**Attend Day 1 of TEAC11 Conference** to learn first-hand from the [Generation Atomic team](#) on how to harness the power of targeted outreach and honing one's advocacy techniques and skills promoting nuclear issues. Learn how to make persuasive Pro-Nuclear arguments, develop social media skills that can reach thousands and how to get your point across to law makers and decision makers.

Last fall, Generation Atomic, amongst many Pro-Nuclear Advocacy groups, were able to save 2 Illinois NPPs from premature shutdown. These groups were able to navigate the state legislations, utility companies, the renewable industry and others to successfully cut through the misinformation and outright falsehoods to present the true facts of the issue and ultimately save these two NPPs. Outreach does work, [attend Day 1](#) of the conference to learn first-hand from some of the best.

---

The Thorium Energy Alliance, as well as the rest of the world, is keeping a close watch on the war in Ukraine with a certain amount of interest paid to the Nuclear Power Plants that are now caught up within the conflict. Russia has made a concerted effort to take control of the 15 Nuclear Reactors located within Ukraine, using military tactics to forcibly take over the reactors. Shelling at the Zaporizhzhia nuclear facility resulted in a fire at a co-located training center but luckily no damage to any reactor has been reported. Mediations initiated by French President Macron along with officials from the IAEA between Russian and Ukrainian officials have begun attempts to create a safe pathway forward for the NPPs in the region and provide for the safety of the brave men and women operating these plants in the middle of a war.

The TEA is hoping for a safe and fast conclusion to these unfortunate events as we watch with the rest of the Nuclear Community.

---

### Donate That Old Car!

The TEA has recently updated our donation program and is currently accepting cars, boats, RVs and whatever else you need gone. If you're tired of looking at that old car sitting in your garage, today's the day to put that old hunk of metal to good use. [Donate](#) it today to the Thorium Energy Alliance!

---

**Thanks to all the support from members new and old, we strive to promote Thorium as the Fuel of the Future. I hope to see you all at the upcoming TEAC11 - it's been far too long!**
