

Thorium Exhibit at the National Museum of Nuclear Science and History

THE FUTURE OF ENERGY

This exhibit honors the legacy of Dr. Alvin Weinberg and the ground breaking work of Oak Ridge National Lab. It memorializes the achievements of the Molten Salt Reactor Experiment and the pioneering engineers, technicians, and scientists who executed the building and operation of the MSRE. It looks to a future of prosperity and abundance made possible by thorium and advanced reactors.

Dedicated October 14th, 2022

This exhibit was made possible by a generous donation and support from:
Ruth Finstrom Hammett & Benjamin Cowles Hammett

ADDITIONAL SUPPORT AND EXECUTION PROVIDED BY:

Thorium Energy Alliance
Whole World LLC Design Engineers
John & Stephanie Kutsch
Vincent Ray Lackowski

INSPIRED BY:

Joe Bonometti and
Hershey Julian - *"We all plant seeds for trees we will never sit under."*
