

## One Year Anniversary of TEAC 11 In ABQ, Exciting Thorium Progress on Multiple Fronts, Help TEA With Our Non-Profit Rating!

---

### TEAC 11 was One Year Ago this week!

It has been such a remarkable year of progress, it feels like the dam is going to break. To see how far Curio, Natura Resources & Next Lab, and Copenhagen Atomics have developed in just the last 12 months gives me hope that the west can deploy nuclear fast, cheap, and safe. (There will be a lot to show at TEAC 12)

### Let me be the first non-profit ask you to consider making a year end donation, even though it is still October . . .

You can imagine that as a non-profit, the donor begging industry is gearing up big time this time of year. We hear from all the clearing houses that we need to have a plan to beg all our members for money. Well, Gifts are great, but we do not want to beg, we just need to show our membership that we have been moving the ball down the field and getting things done with your support – Such as:

- **El Salvador Nuclear Deployment Plan** – with over 2,900 hours and several trips to El Salvador to help them create a plan to deploy Advanced Gen4 Thorium fueled nuclear, first research reactor will be running in 24 months
- **Thorium Bank** - Building a Thorium Supply Chain has been our goal for years and the pieces look to be coming together after years of struggle
- **Thorium Based Materials R&D** – From super conductors and alloys to work on catalysts, TEA has made progress in getting companies to look at restarting their use of Thorium as a critical material
- **ANS 20.2 – The Official Definition of an MSR** – Vince Lackowski of T.E.A. kept this project going for years with David Holcomb, now with INL. The work is tedious but the world needs this standard

### You can also give us the gift of a nice recommendation – Take a minute and give us all the stars

Organizations like “Great Non-Profits” actually have influence in the NGO world, so you would be giving us a big hand if you took a couple minutes to give us some nice words and all the stars – See below:

**If you love our work then tell the world!** Stories about us from people like you will help us make an even bigger impact in our community. GreatNonprofits – the #1 source of nonprofit stories and feedback – is honoring highly regarded nonprofits with their 2023 Top-Rated List. Won't you help us raise visibility for our work by posting a brief story of your experience with us? All content will be visible to potential donors and volunteers. It's easy and only takes 3 minutes! Go here to get started! <https://greatnonprofits.org/reviews/write/thorium-energy-alliance>

The Deadline is October 31<sup>st</sup>, not much warning, we know, so just do it now if you can – Thank you very Much!

---

**Yet even more Posts and Thorium Videos coming your way – Even TEAC 12 in 2024**

If you notice a lot more posts on our Social Media channels these days, it is because we have some new help. You will soon see videos coming out at more regular intervals, and we hope to more regularly hit you all with the latest research, applications and patent submissions etc. We are even looking to start a sub-stack newsletter and take advantage of that very good service.

We are even working up the motivation to plan TEAC 12 (!) More on that in the next Newsletter.

**Thank You Each and Every One of You**

**There is no Thorium Energy Alliance without its members**

---

### **Atomic Hope - Inside the Pro-Nuclear Movement**

*Atomic Hope* follows a tiny global movement of pro-nuclear activists, who strongly believe we need nuclear power in order to decarbonize our energy systems and avoid calamitous climate change. Filmed over a ten-year period, these advocates for nuclear energy come from all over the world. Their opponents cite nuclear meltdowns, extortionate construction costs, radiation fears and nuclear waste as indisputable reasons to reject this technology. The pro-nuclear crew take on these arguments urging scientists, citizens and policy makers to take a sober look at the science, halt the mass closure of nuclear power plants and fully reconsider nuclear energy as a viable solution to imminent catastrophe.

Directed by Frankie Fenton. Produced by Kathryn Kennedy and Frankie Fenton.

[Request a Screening](#) or Petition your Local Movie Festival to show this great documentary on the need for a future powered by nuclear.

## Support the TEA today!

The Thorium Energy Alliance just received another car donation! Thanks to another generous supporter for another much-needed vehicle donation. Let us know if you'd like to donate a car or other vehicle to the cause.

Your generous support keeps us going. You can help in many ways including:

- [Donate](#) or Become a [Supporting Member](#)
- [Donate that old car](#)
- [Buy a shirt](#)

---

So grateful to everyone who has made all of our successes a reality. 2023 is shaping up to be the best Thorium Year yet!

John Kutsch  
Executive Director
