

Thorium Will Power The World

The NEW Standard for MSR - ANS 20.2 - *We Got it Done!*

We are so proud of the work that Thorium Energy Alliance did to help get this new standard across the finish line. Vince Lackowski of T.E.A. put in hundreds of hours to help organize the massive effort and get all the members to work together (Over 8 Years !)

Dr. David Holcomb will present his talk at TEAC12 and highlight the work product of the ANS 20.2 working group - the standard has now been published.

One ally to bring attention to could be **Jeremy Hampshire – ANS Nuclear News.**

He has written some great articles about the value of the historic research data. Help us reach out to Jeremy JHampshire@ans.org and see if he will also promote the preservation of the artifacts in Nuclear News. Rick Michal is the editor-in-chief of Nuclear News; here is his e-mail: rmichal@ans.org. And here are two more contacts we could reach out to:
