

THORIUM is a future of Prosperity, & Abundance and The world can get it with Thorium Power and critical materials - this is the 1,000,000X solution.

**The Best Reason to Attend TEAC12 :
We tackle the troubling topics no one else is speaking
about.**

Look at OUR list of topics and compare them to other nuclear organizations.

We have gone to many conferences - and we never see talks about Nuclear Waste, Critical Materials that the west Does NOT have, and there will be no nuclear renaissance without them, real calls for the NRC to drop LNT as standard that is totally NOT based in science - we are even going to talk about dirty bombs and how they are most definitely NOT what you think they are!

If you see any other organization willing to tackle all of those in one event -

We pay for your admission fee:

You will only Get This at TEAC12

**NEW BOOKS - Earth Is A Nuclear Planet - False Ratio
and Nuclear is HOT**

We will present these Books at TEAC12 - This is your chance to hear from the Author(s)

You do not want to miss this historic event at TEAC 12

***We KNOW - We Ask and ASK - But for the future - PLEASE!
SAVE the MSRE Artifacts - Our History is in danger of being
destroyed.***

***The last of the U233 is on its way to being destroyed
The rarest material on Earth will be lost because of laziness
and greed of Lab operators who just want to throw it all
away!***

Reach out to us or even contact **Jeremy Hampshire – ANS Nuclear News.**

He has written some great articles about the value of the historic research data.

Help us reach out to Jeremy JHampshire@ans.org and see if he will also promote the preservation of the artifacts in Nuclear News. Rick Michal is the editor-in-chief of Nuclear News; here is his e-mail: rmichal@ans.org.

And here are two more contacts we could reach out to:
