

Thorium Will Power The World

THORIUM is the future of Prosperity, & Abundance

Be the first or second to buy a T-shirt (X-Mass!!!) get this very interesting book about Dow's first attempt to go nuclear, and we'll even toss in a mess of stickers and buttons!

November 2025 Thorium Feats

Travels for Fuels | Shut Down After Effects | Energy Celebration - You're Invited

1.) Thorium Products Corp.Travels for Fuels and Other Vendor Visits

We went on a long trip around the planet looking at technology vendors for systems like SOEC Electrolyzers and Heat exchangers, this was for a fully synthetic fuels project that Syntholene Energy Corp is standing up. While Geothermal is currently standing in for nuclear, there are plans to produce true eSAF by nuclear process heat also. A really outstanding project that will supply the world with the pure aviation fuel it needs.

We got to see how vendors are starting to serve this new industry of Syn-Fuels. One of our stops was in China , and while there, this news came out:

China reports out that TMSR LF-1 has been refueled with Thorium, is breeding , and has been running for 3 years

That is exciting to finally have that fuel cycle demonstrated to the world after 70 years of conjecture. They did what MSRE never got to do, run on thorium - good for them!.

We do hope that Western reactor vendors get a boost from this - like Copenhagen Atomics and their thorium fueled reactor system.

We got to see the Copenhagen Atomics factory on this trip too, and I tell you, it is what every advanced reactor company wishes they were doing. CA had many test systems running and new ones being fabricated, Salt fabrication and testing - it gives us hope for the Thorium fuel cycle, It gave me hope that with some luck and investors, it'll get done.

2.) Shut Down Ends, Thorium Products Corps gets NRC Next Step for License

It is hard to get excited by the end of the shut down when it just means adding another 3 month setback in our license process when we finally just get back to where we were on September 30th.

As we reported out, **TEA and TPC** have assembled a complete and well crafted license application for both a Demonstration facility and a Full production facility.

To not waste time during shutdown, we completed a safety and hazard analysis for the Thorium Products demonstration plant. That is a big job, with multiple teams and red teams all challenging safety aspects of the process plan. It has made the design for the facility stronger - and shows the NRC that we are serious about being 1st class operators.

We have many professionals helping us get this license, including some from Disa.

Disa is a company that aims to process Uranium tails and leftover ore stacks, and they have gotten their license in just 6 months (!) - it shows it can be done - and TEA / TPC will get it done.

Now that the shut down is over, we feel the NRC will accept our license on December 22, get us back on track, and we can then strive to get the license delivered early in the new year.

TEA will keep its promise to "power the world" with thorium.

3.) Energy Wealth Project to Celebrate Energy and Stem August 7th 2026

Our sister organization, Energy Wealth Project, is planning a fund raiser for **August 7th 2026. EWP** promotes advanced energy systems as way to wards opportunity, prosperity and education. We know this is not quite a Thorium TEAC conference - but coming to it, and supporting the work will also deliver on the goals we all have to provide opportunities for the next generation - **It will be Aug 7 in Crystal Lake, Illinois, USA at the Raue performing Arts center** - great bands, drinks, food! and you'll get to hang with the best thorium folks!

Your basic tickets will be almost free! About \$25! so drop the organizers a line and let them know you want to attend, and we will put you on the list:

dinaworldone@yahoo.com , skutsch@gmail.com

It fills us with great hope that so much forward progress is happening now, Shutdown ending, NRC and the DoE being real good about working with us. It makes us very eager to move things along - Build our "Thorium Bank", Supply the world, Create opportunity and abundance.

. All of this progress is because you all support us - We are Thankful for all of you.

Below, is a link to a good, pretty long interview that you can watch at high speed. Corbett interviewed us 13 years ago, he wanted to catch up - it was real fun.

Video player not working? Use these links to watch it somewhere else!

ORNL Still Wants to Destroy the MSRE Artifacts.

We Still Need Folks to Keep At it ! The company tearing apart the MSRE building just wants to throw out everything ! Including stuff already on display ! - The Albuquerque Nuclear Museum, a Smithsonian Institution, has said they would take everything! This is a no brainer we have been fighting to correct for over 10 years. *We need just one more volunteer to help us save the MSRE artifacts, please help us* at your service. Replace this text with yours. (volunteers, Please bear with us , we are working to onboard everyone)

You Can Donate Anything that moves - It really Helps! TEA

We Got DONATIONS !!!

We want your car, plane, boat today - donate that vehicle! Thanks to all who donated

[CLICK THIS TO DONATE YOUR CAR, BOAT, PLANE](#)

**Be The First to Buy a T-shirt and Get a Book and
stickers**

for the nerd in your life
